Photographic Attributes: A - H

Photography Has A Unique Relationship To Time, In Part Because The Image Is Created By The Interaction Among Light, A Lens, And Light-sensitive Film During A Particular Moment. Light Rays Refracting Through The Lens Trace The Image Onto Film; This Happens In An Instant And Reflects The Instant In Which The Image Was Created. A Drawing Or Painting May Describe A Particular Time And Place, But ... Jan 1th, 2020
